

The Classification of KSP Methods based on the Result

1. **Rainfall Amount** (Based on the Astronomical Calculation)
2. **Rain Type**
 - a. Based on the Cloud type assertion
 - b. Famine Indication
3. **Rainfall Time**
 - a. General Prediction
 - i. Astronomical Calculation
 1. Planets (Graha) and stars' movement
 2. Specific stars' conjunction for cloud gathering and rainy time
 - b. Sudden Rainfall Prediction
 - i. Based on the Natural Phenomenon
 - ii. Animal Behaviour
 - iii. Human Activities
 - c. Prior Rainfall Prediction
 - i. Daily
 1. Observational calculation-based
 - a. Wind direction at specific times in the day
 - ii. Yearly
 1. Observational calculation-based
 - a. Cloud observation at a specific time
 2. Calculation Based
 - a. Based on the Ruler and Minister Planets (Grahas)
 3. Observation Based
 - a. Rain in a specific Astronomical conjunction
 - iii. Monthly
 1. Observational calculation-based
 - a. Rain on a specific Astronomical conjunction
 - b. Rain on a specific day of the week
 - c. Wind direction in a specific astronomical position
 - d. Sunrise and sunset timing in a specific astronomical event
 - e. Cloud observation of the specific stars' conjunction

2. Calculation Based
 - a. Specific stars movement
3. Observation Based
 - a. Based on the Natural Phenomenon
 - i. Lightning
 - ii. Fog
 - iii. Duststorm
 - iv. Cloud
 - v. Rain
 - vi. Hain Water
 - vii. Wind direction
 - viii. Sun rays
 - ix. Ritualistic Result
